**Subject:** West Lake Landfill Update: congressional staff who will be on the call and issues/concerns

Congressional Staff

**McCaskill**

Joeana Middleton

Mark Fowler

**Blunt**

Kerry DeGregorio

**Clay**

Pauline Jamry

Steve Englehardt

Lou Aboussie

**Wagner**

Erik Rust

Brecht Mulvihill

Current Concerns/Issues:

**Clay**

1. ASPECT results
2. Dr. Criss's report

-

**Blunt**

-

1. Will there be a response from EPA on Washington University's Dr. Robert Criss' report dated 3/14/2013 titled Risk and Character of Radioactive Waste at the West Lake Landfill, Bridgeton, Missouri?

2. According to our update by your office in March 2013 the ground water testing was to be repeated over a 12 month period, has the second water test been conducted?

3. The National Remedy and Review Board is involved in the re-examination of the current ROD remedy. According to Mr. Brooks' letter to Senator Blunt earlier this year the NRRB had recommended in early 2012 that additional studies to improve the Supplemental Feasibility Study be completed such as the groundwater testing. Is the NRRB aware of the underground fire in the residential waste area of West Lake Landfill?
